

Relaxed Spacing:

1m radius social zone

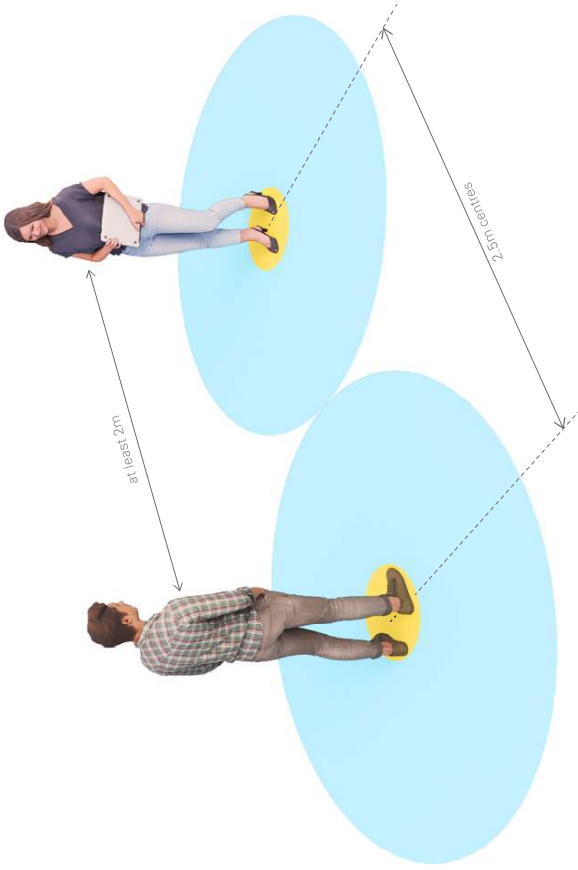

Using a single circle zone of 1m radius to represent the social distancing area results in individuals spaced closer together than 2m.

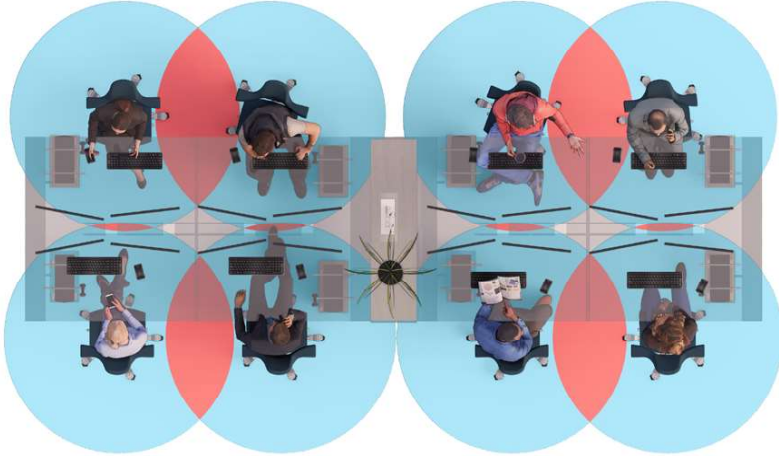

Strict Spacing:

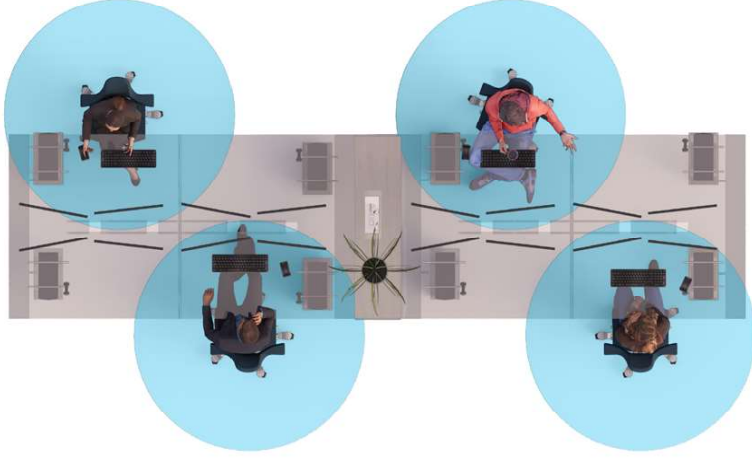

500mm personal zone + 1m radius social zone

An overall radius of 1.25m achieves a minimum of 2m spacing between individuals with some buffer for people shifting around the space.

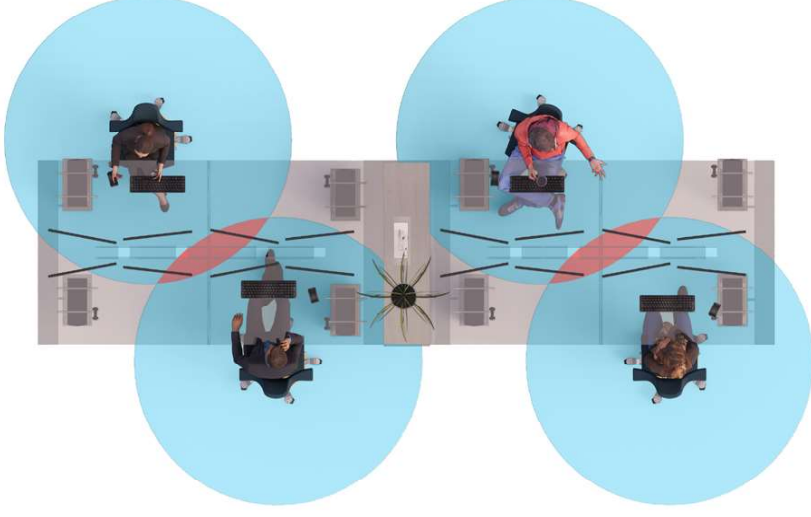

Normal Seating

50% @ relaxed spacing

50% @ strict spacing

- social distancing zone
- zone overlap
